A challenging year comes to an end

Although inflation rates in the US fell more sharply than expected, the Christmas rally failed to materialize in December. Instead, interest rate levels turned upward again, which weighed on the stock markets. The Globalance Zukunftbeweger Focused fund also closed the month in negative territory. Support came from the megatrend themes of health & aging and automation, which declined significantly less than the broad equity market. At the stock level, PeptiDream (Japanese biotech company focused on peptide therapeutics) and Omnicell (provider of automated and digital solutions for the healthcare sector) accordingly stood out positively. Despite a painful break in 2022, there has been no change in the relevance and potential of the future themes we are pursuing. On the contrary, the roughly 30% more favourable valuation of our portfolio companies compared to the previous year provides attractive entry opportunities.

Statistics (Performance and risk on December 31, 2022)

Performance month of December	-7.4%	Annualized performance since 11.11.2019	-2.0%
Performance year to date	-27.6%	Annualized volatility	22.0%
Sharpe Ratio	NA		

5 reasons for the Globalance future mover Focused

- + High potential return
- + Participation in relevant future themes
- + In line with the Paris climate targets
- + Positive impact with the Globalance Footprint®
- + Professional partners (theme investments since 1995)

Investment strategy

The Globalance Zukunftbeweger Focused fund makes targeted investments in roughly 70 equities which feature in the most innovative growth areas, such as digitalisation, new mobility or megacities.

Zukunftbeweger (Futuremovers) are companies which respond successfully to the most important megatrends and derive above-average benefits from the growth potential of this sector.

When making its selection Globalance Bank takes care to ensure that these companies have a positive Globalance Footprint®, i.e. a positive effect on the economy, society and the environment, as well as the lowest possible warming potential.

potential of the
fund

This portfolio has a low warming potential

The warming potential is based on a methodology developed by MSCI ESG and indicates whether a portfolio is within the agreed target of the 2015 Paris Climate Agreement. For the calculation, the values of the individual investments are capital-weighted and added together.

Explanation: 24 % of the invested capital has a warming potential of 2 - 3.9°C.

Footprint

The impact of Globalance Zukunftsbeweger Focused Fund on the economy, society and the environment

View the fund's footprint [here](#)

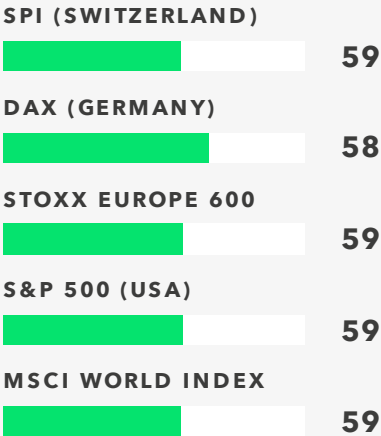

The footprint of this portfolio is positive

The Globalance Footprint® shows what our investors assets around the world are doing - individually and at a glance. Our grid is simple and objective. We assess the contribution to economic prosperity, the sustainability of society and the preservation of our natural resources on the basis of nine themes.

Explanation: 2 % of invested capital has an adverse footprint, 29 % of invested capital has a balanced footprint and 68 % of invested capital has a positive footprint. Each of the nine dimensions is evaluated on a scale of 0 - 100 and assigned a weight. The Footprint total value is calculated by adding the weighted scores of the individual dimensions.

Further information

Learn more

The effect of the portfolio

Increasing weather extremes, the melting of the polar ice caps and other consequences can be directly linked to global warming. The climate crisis has an impact on wealth and vice versa. The principles of sustainability are the foundations for a livable society and a healthy environment. Integrating sustainability into a portfolio increases the resilience and potential of assets.

The warming potential in a global context

To put the warming potential in perspective, we show the possible global emissions pathways to 2100 (chart). These were created by Climate Action Tracker and show different scenarios ranging from current political projections to short-term country pledges (until 2030) and long-term country pledges (until 2050).

Globalance Footprint

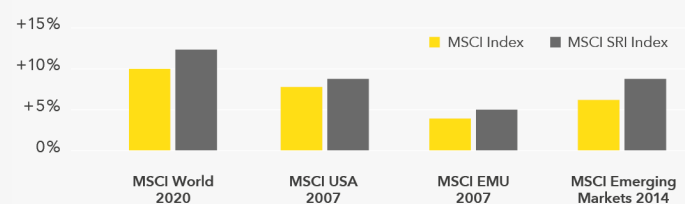

The Globalance Footprint shows what assets do in the world - in the areas of economy, society and environment. Whether shares, real estate or tangible assets: We make a systematic assessment of the impact of all investments. Our grid is simple and objective. A total of nine criteria represent sustainable foundations for prosperity, the future viability of society and the preservation of our natural life-support systems. The Footprint is positive if the value is greater than 54.

Return on investment and sustainability

Historical comparisons between traditional and sustainable stock indices (MSCI SRI Index) show that sustainable indices generate better returns than traditional ones. In addition, by integrating factors such as ESG as a risk instrument, portfolios become more resilient in times of crisis and thus offer a better risk/return profile.
