

WORLD'S FIRST

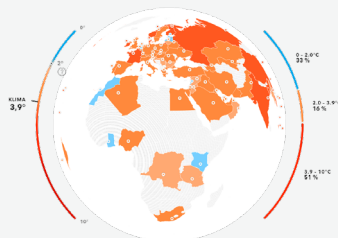

# New perspectives on your wealth

Globalance World is a digital globe for investors who want to evaluate the future viability and sustainability of their investments.

By using interactive infographics, Globalance World gives you a better understanding of the complex interrelationships of the investment and its effect. You have access to thou-

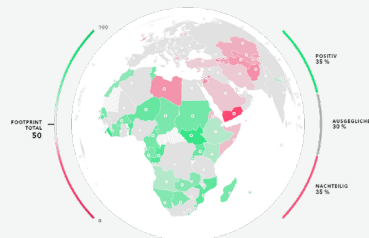

sands of businesses and their influence on the economy, society and environment. There is always something new to discover and in addition, a stream of further investment options.

## A kind of Google Earth for investments

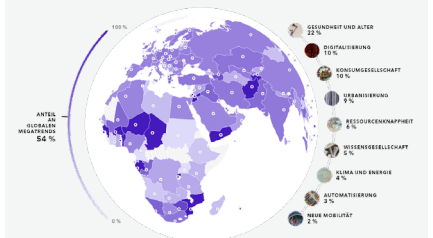

### CLIMATE

The warming potential is based on a method developed by MSCI Carbon Delta to analyse the alignment and create a long-term 2°C climate stabilisation scenario.

### FOOTPRINT

The Globalance Footprint® shows what impact an index or portfolio is achieving around the world—individually and at a glance.

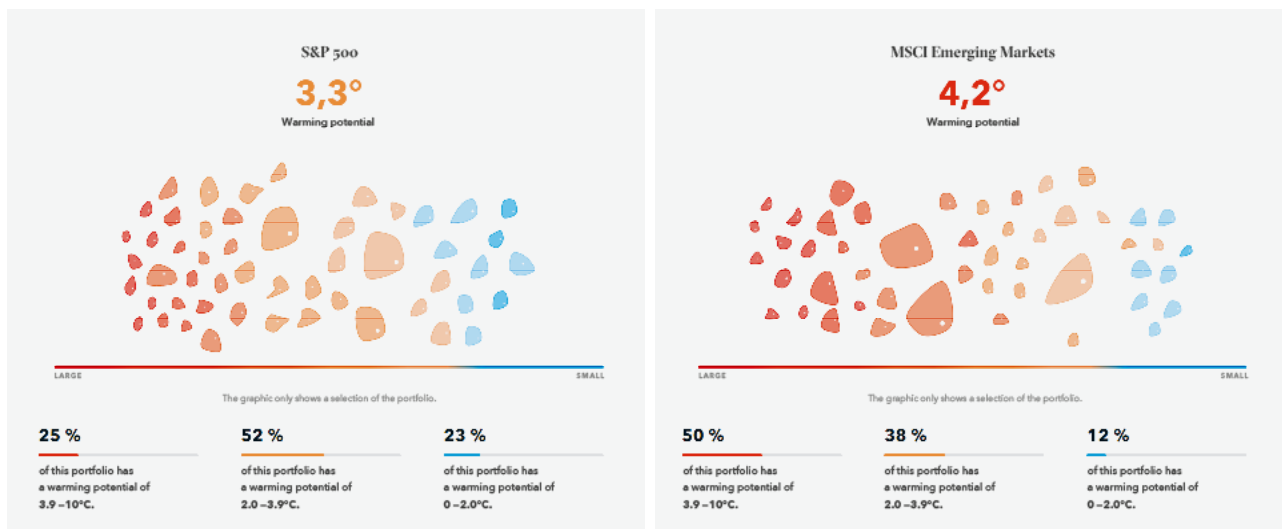

### MEGATRENDS

The Globalance megatrend analysis shows the revenue share of businesses earned from one or several megatrends.

# Compare Market Portfolios

Compare two portfolios (such as DAX, SPI and MSCI) with each other and see which one performs better in terms of climate, returns, megatrends and footprint, in real time and interactively.

## And how transparent is your portfolio?

How future-proof is it? Is it invested in the past or is it exposed to megatrends and therefore in the winners of the future? How high is it's climate warming potential?

And what footprint does it have? Find out now!

### Transparency

New perspectives and transparency on your own assets and their impact

### Comparability

Compare your portfolio with various portfolios from around the world

### Future viability

Losers are exposed and future movers are revealed

#### ABOUT GLOBALANCE

Globalance is an owner-run Swiss private bank which invests in future topics with a positive footprint. With the Globalance Footprint®, Globalance Bank is the first bank worldwide to show you the effect that your assets have on the economy, society and environment. The trend towards sustainable

investments isn't slowing down. Especially in the last three years, the investment volumes have risen sharply. With the innovative investment tool, Globalance World is offering you transparency at a time in which more things seem to be sustainable and future-proof than actually are.
