

Globalance Sokrates Fund

Record Highs Despite Rising Rates and Oil Prices

Following a temporary relaxation of tensions in the Middle East and greater stability in technology stocks, several equity indices reached new record highs in early August. Concerns over high government debt drove yields on long-term US Treasuries noticeably higher, while renewed tensions in the Middle East pushed oil prices up and kept inflation risks elevated. A remark by new Fed Chair Kevin Warsh, noting that the inflation picture had not improved materially, was interpreted by markets as a signal of possible rate hikes. The Globalance Sokrates Funds capitalized on this positive market momentum and closed the month with a positive performance. This pleasing performance was driven significantly by equity selection, with Core equities as well as the Zukunftsbeweger and Infrastructure equities performing well. In addition, the fund benefited in particular from the performance of its gold position.

Statistics (performance and risk)

Performance month of August	1.5%
Performance year to date	3.6%
Sharpe Ratio	0.3
Annualized performance (since 1.1.2012)	1.8%
Annualized volatility	6.4%

Investment Strategy

The Globalance Sokrates Fund invests (in a BVV2-compliant manner) in a dynamically managed combination of broadly diversified asset classes including shares, bonds, real values such as real estate or low-correlated investments, such as insurance-linked securities or premium strategies. The investment strategy allows a tactical weighting of the asset classes depending on the market assessment. Based on this weighting, Sokrates then invests in individual assets and investment funds with a positive footprint and a low impact on climate change. Investors benefit here from the broad diversification of the asset classes, from the marketpotential of future oriented asset sectors and thepositive effect of the assets.

5 reasons for the Globalance Sokrates Fund

- + Broadly diversified investment strategy for long-term growth for your investment assets, pension plan assets or foundation assets
- + The first fund in the world to provide a footprint report on direct impact on the economy, society and the environment
- + Investment selection criteria with a view to megatrends that hold great potential, such as digitization, new mobility or urbanization
- + Fewer risks thanks to compliance with the 2.0°C climate target of the Paris Agreement
- + Dynamic control of the asset classes for an optimization of both returns and risks, depending on the market

Climate

Warming potential of Globalance Sokrates Fund

This portfolio has a low warming potential

The warming potential is based on a methodology developed by MSCI ESG and indicates whether a portfolio is within the agreed target of the 2015 Paris Climate Agreement. For the calculation, the values of the individual investments are capital-weighted and added together.

The effect of the portfolio

Increasing weather extremes, the melting of the polar ice caps and other consequences can be directly linked to global warming. The climate crisis has an impact on wealth and vice versa. The principles of sustainability are the foundations for a livable society and a healthy environment. Integrating sustainability into a portfolio increases the resilience and potential of assets.

The warming potential in a global context

To put the warming potential in perspective, we show the possible global emissions pathways to 2100 (chart). These were created by Climate Action Tracker and show different scenarios ranging from current political projections to short-term country pledges (until 2030) and long-term country pledges (until 2050).

Globalance Footprint

The Globalance Footprint shows what assets do in the world - in the areas of economy, society and environment. Whether shares, real estate or tangible assets: We make a systematic assessment of the impact of all investments. Our grid is simple and objective. A total of nine criteria represent sustainable foundations for prosperity, the future viability of society and the preservation of our natural life-support systems. The Footprint is positive if the value is greater than 54.
