

Globalance Sokrates Fund

Rate Concerns and Diplomacy Shape Markets

In June, robust US employment figures unsettled investors, reinforcing expectations of a more restrictive monetary policy. In addition, a disappointing outlook from semiconductor manufacturer Broadcom weighed on the previously strong technology sector. Some relief came from a joint US-Iran statement on resolving the conflict. Toward month-end, nervousness in the technology sector picked up again, prompting many investors to rotate into more defensive sectors. The Globalance Sokrates Fund held its ground in this environment and closed the month with a positive performance. Key positive contributions came from corporate and emerging market bonds as well as infrastructure investments.

Investment Strategy

The Globalance Sokrates Fund invests (in a BVV2-compliant manner) in a dynamically managed combination of broadly diversified asset classes including shares, bonds, real values such as real estate or low-correlated investments, such as insurance-linked securities or premium strategies. The investment strategy allows a tactical weighting of the asset classes depending on the market assessment. Based on this weighting, Sokrates then invests in individual assets and investment funds with a positive footprint and a low impact on climate change. Investors benefit here from the broad diversification of the asset classes, from the market potential of future oriented asset sectors and the positive effect of the assets.

Statistics (performance and risk)

Performance month of June	0.3%
Performance year to date	2.8%
Sharpe Ratio	0.4
Annualized performance (since 1.1.2012)	2.6%
Annualized volatility	6.8%

5 reasons for the Globalance Sokrates Fund

- + Broadly diversified investment strategy for long-term growth for your investment assets, pension plan assets or foundation assets
- + The first fund in the world to provide a footprint report on direct impact on the economy, society and the environment
- + Investment selection criteria with a view to megatrends that hold great potential, such as digitization, new mobility or urbanization
- + Fewer risks thanks to compliance with the 2.0°C climate target of the Paris Agreement
- + Dynamic control of the asset classes for an optimization of both returns and risks, depending on the market

Climate

Warming potential of Globalance Sokrates Fund

This portfolio has a low warming potential

The warming potential is based on a methodology developed by MSCI ESG and indicates whether a portfolio is within the agreed target of the 2015 Paris Climate Agreement. For the calculation, the values of the individual investments are capital-weighted and added together.

Information

The effect of the portfolio

Increasing weather extremes, the melting of the polar ice caps and other consequences can be directly linked to global warming. The climate crisis has an impact on wealth and vice versa. The principles of sustainability are the foundations for a livable society and a healthy environment. Integrating sustainability into a portfolio increases the resilience and potential of assets.

The warming potential in a global context

To put the warming potential in perspective, we show the possible global emissions pathways to 2100 (chart). These were created by Climate Action Tracker and show different scenarios ranging from current political projections to short-term country pledges (until 2030) and long-term country pledges (until 2050).

Globalance Footprint

The Globalance Footprint shows what assets do in the world - in the areas of economy, society and environment. Whether shares, real estate or tangible assets: We make a systematic assessment of the impact of all investments. Our grid is simple and objective. A total of nine criteria represent sustainable foundations for prosperity, the future viability of society and the preservation of our natural life-support systems. The Footprint is positive if the value is greater than 54.
