Globalance Zukunftbeweger Focused Fund

Rising Interest Rates Dampen Market Sentiment

In September, the attention of global financial markets centred primarily on monetary policy and the renewed escalation of the conflict in the Middle East. The US Federal Reserve raised its key interest rate for the first time since 2023. Persistent inflationary pressure, geopolitical uncertainty and concerns over high levels of government debt pushed long-term bond yields higher around the world, weighing on equity markets at times. The Globalance Zukunftbeweger Focused Fund could not escape this challenging environment and ended the month with a negative performance. The Automation megatrend, however, provided positive impulses. Notable performers included Teradyne (a US company that designs, manufactures and markets electronic test systems) and VAT Group (a Swiss specialist in vacuum valves and modules). Both titles proved resilient and confirmed the strength of innovation-driven business models in a difficult market environment.

Investment Strategy

The Globalance Zukunftbeweger Focused Fund makes targeted investments in roughly 70 equities which feature in the most innovative growth areas, such as digitalisation, new mobility or megacities.

Zukunftbeweger (Futuremovers) are companies which respond successfully to the most important megatrends and derive above-average benefits from the growth potential of this sector.

When making its selection Globalance Bank takes care to ensure that these companies have a positive Globalance Footprint®, i.e. a positive effect on the economy, society and and the environment, as well as the lowest possible warming potential.

Climate

Warming potential of Globalance Zukunftbeweger Focused Fund

This portfolio has a low warming potential

The warming potential is based on a methodology developed by MSCI ESG and indicates whether a portfolio is within the agreed target of the 2015 Paris Climate Agreement. For the calculation, the values of the individual investments are capital-weighted and added together.

Globalance

Information

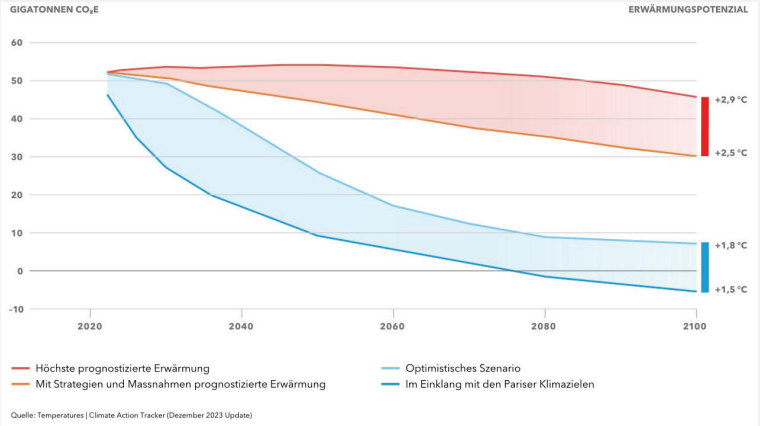

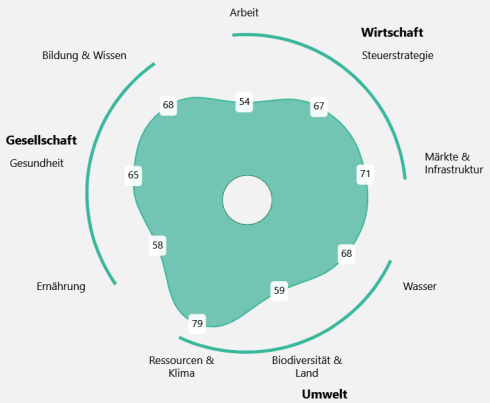

The effect of the portfolio

Increasing weather extremes, the melting of the polar ice caps and other consequences can be directly linked to global warming. The climate crisis has an impact on wealth and vice versa. The principles of sustainability are the foundations for a livable society and a healthy environment. Integrating sustainability into a portfolio increases the resilience and potential of assets.

The warming potential in a global context

To put the warming potential in perspective, we show the possible global emissions pathways to 2100 (chart). These were created by Climate Action Tracker and show different scenarios ranging from current political projections to short-term country pledges (until 2030) and long-term country pledges (until 2050).

Globalance Footprint

The Globalance Footprint shows what assets do in the world - in the areas of economy, society and environment. Whether shares, real estate or tangible assets: We make a systematic assessment of the impact of all investments. Our grid is simple and objective. A total of nine criteria represent sustainable foundations for prosperity, the future viability of society and the preservation of our natural life-support systems. The Footprint is positive if the value is greater than 54.
