

Globalance Zukunftbeweger Focused Fund

Global Markets React to US Tariffs

Global financial markets came under significant pressure at the beginning of the month after US President Donald Trump announced new sweeping tariff measures on "Liberation Day." Fears of escalating trade conflicts visibly weighed on stock exchanges and, due to a loss of confidence, led to a weakening of the USD. In response to the severe market turmoil, Trump temporarily suspended the planned retaliatory tariffs against all trading partners (with the exception of China) for 90 days. This led to a stabilization of stock markets by the end of the month, although the USD remained at a low level. In this environment, the Zukunftbeweger Focused Fund stood out positively from the market as a whole - thanks in particular to its focus on future-oriented megatrends such as consumption and the knowledge society. At company level, Netflix (US media company) and Mercadolibre (leading online marketplace in Latin American) shone with double-digit positive monthly returns.

Investment Strategy

The Globalance Zukunftbeweger Focused fund makes targeted investments in roughly 70 equities which feature in the most innovative growth areas, such as digitalisation, new mobility or megacities.

Zukunftbeweger (Futuremovers) are companies which respond successfully to the most important megatrends and derive above-average benefits from the growth potential of this sector.

When making its selection Globalance Bank takes care to ensure that these companies have a positive Globalance Footprint®, i.e. a positive effect on the economy, society and the environment, as well as the lowest possible warming potential.

Climate

Warming potential of Globalance Zukunftsbeweger Focused Fund

This portfolio has a low warming potential

The warming potential is based on a methodology developed by MSCI ESG and indicates whether a portfolio is within the agreed target of the 2015 Paris Climate Agreement. For the calculation, the values of the individual investments are capital-weighted and added together.

Weitere Informationen

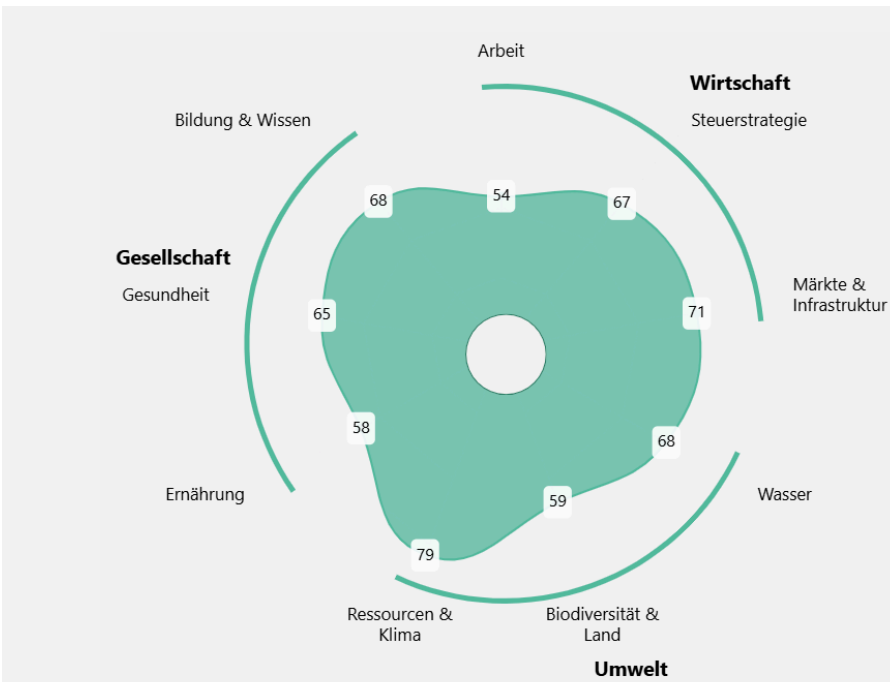

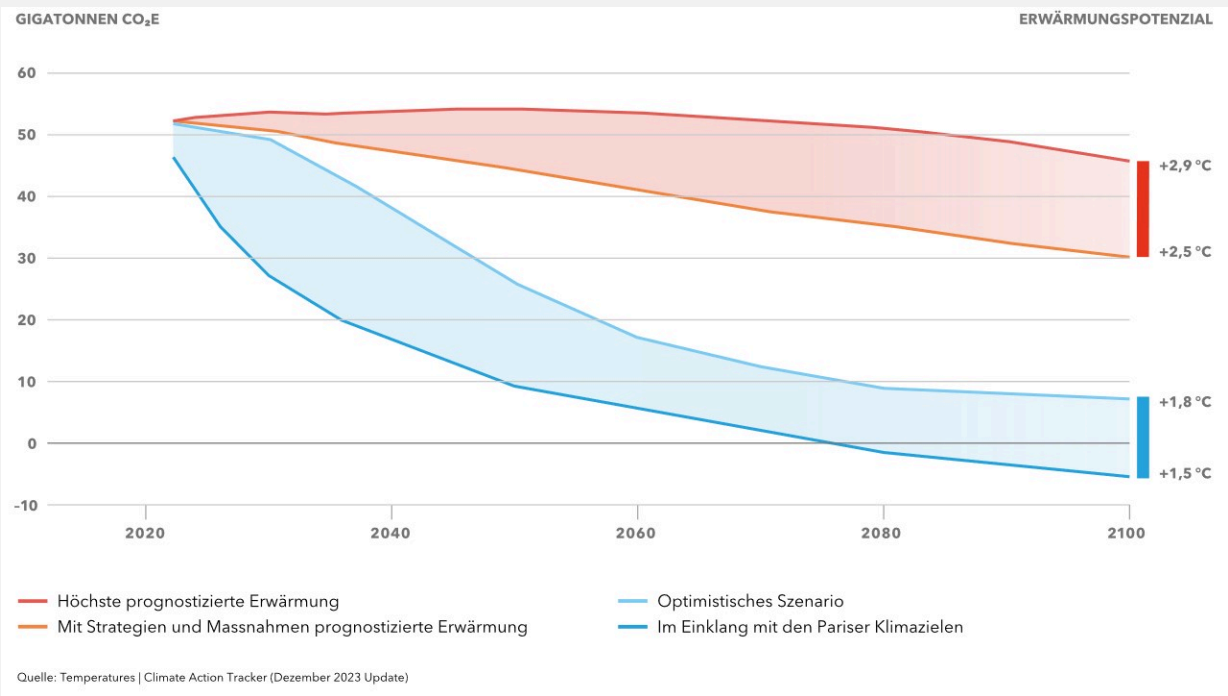

The effect of the portfolio

Increasing weather extremes, the melting of the polar ice caps and other consequences can be directly linked to global warming. The climate crisis has an impact on wealth and vice versa. The principles of sustainability are the foundations for a livable society and a healthy environment. Integrating sustainability into a portfolio increases the resilience and potential of assets.

The warming potential in a global context

To put the warming potential in perspective, we show the possible global emissions pathways to 2100 (chart). These were created by Climate Action Tracker and show different scenarios ranging from current political projections to short-term country pledges (until 2030) and long-term country pledges (until 2050).

Globalance Footprint

The Globalance Footprint shows what assets do in the world - in the areas of economy, society and environment. Whether shares, real estate or tangible assets: We make a systematic assessment of the impact of all investments. Our grid is simple and objective. A total of nine criteria represent sustainable foundations for prosperity, the future viability of society and the preservation of our natural life-support systems. The Footprint is positive if the value is greater than 54.
